NEW E921KALN

ALTERNATE ACTION SWITCH WITH LED Push On, Push Off, and always have visual indicator. Instead of a traditional momentary switch, the E921KALN is alternate action, so 1 push closes the circuit and a second push opens it. It also adds a bright blue LED inside the button so users can always tell whether it is on or off. This high quality switch also comes pre-installed on 6' of cable with stripped and tinned leads for easy installation.

BRIGHT BLUE LED

A blue LED indicates the on/off state and offers visual feedback it has been actuated.
(LED Voltage must be 4.75 VDC min)

**COMFORTABLE
ERGONOMIC DESIGN**

The unique shape was design to fit perfectly in the hand for easy grip and comfortable operation.

**SWITCHCRAFT
QUALITY**

For over 70 years, Switchcraft has been building high quality connectors and switches in their factory in Chicago.
