

Panasonic Line Extension

Grid-EYE® Infrared Array Sensor, Narrow Angle Type

Now With A Narrow Field of View of 35.6 Degrees!

Panasonic, a worldwide leader in Sensor technology, is pleased to announce the expansion of the Grid-EYE Infrared Array Sensor product line with the addition of the **NEW Grid-EYE Narrow Angle Type, Part Number AMG8854M01**. This **NEW Grid-EYE Narrow Angle Sensor** offers a field of view of 35.6 Degrees! This allows the Grid-EYE Sensor to focus on closer objects with enough pixels to be able to identify and measure those objects.

Features and Benefits

- Narrow Angle Field Of View Of 35.6 Degrees
- Reduced From Standard Of 60 Degrees To Allow Better Focus For Closer Objects
- Mount On PCB Board
- Module Type
- Environmentally Friendly
- RoHS And REACH Compliant

Industries

- BEMS
- Security
- Appliance

Applications

- Smart Building Management Systems
- People Tracking
- Air Conditioners: To Adjust Based On Temperature Of The Room
