Electric Imp April: Basic prototyping

PRODUCT ID: 1130

DESCRIPTION   −

The April is a handy companion for your Electric Imp card. This breakout board provides just the bare minimum for Imp life support – a socket, an ID chip, and a 3.3v buck power supply for high power efficiency. Small and cheap, it's easy to integrate into products for demos or even use in low-volume production.

Dimensions: 51mm x 32mm x 6mm (without header) or 11mm (with header)

Power supply: USB mini-B and pads for 3.4-16v battery/DC input with reverse voltage protection.

PLEASE NOTE: The electric imp is not included!
