The SSL40C series is a 40 W universal input ac-dc external Class II power supply in a 4.65 x 2.40 x 1.08 inch plastic enclosure. The SSL40C represents the next generation of low cost external power supplies, suitable for a host of worldwide low power external power applications. The SSL40C provides up to 40 W under natural convection cooling. Standard features include universal ac input, overvoltage and short circuit protection and meets EN55022 level B for conducted emissions. The SSL40C has several output voltages available ranging from 12 V to 48 V. The series has full international safety approvals and carries the CE mark to provide pre-approved SELV outputs.

All specifications are typical at nominal input, full load at 25 °C unless otherwise stated

### Notes

- 1 Peak output current lasting less than 3 seconds and non repetitive. During peak loading output voltage may exceed total regulation limits.
- 2 20 MHz bandwidth, peak to peak, measured using 0.1  $\mu$ F ceramic capacitor in parallel with a 10  $\mu$ F tantalum capacitor at the point of output load.
- 3 Total regulation is defined as the static output regulation at 25 °C, including initial tolerance, line voltage within stated limits, load currents within stated limits, and output voltages adjusted to their factory settings.
- 4 To help maintain the power supply safety approvals, the IEC320/C7 input connector cable must be rated minimum 3 A and approved by an applicable safety agency for the intended country of use. National and international variations on mains plugs, adapters and customer preference to lead length prevents Artesyn from supplying an IEC320/C7 (or compatible) input connector cable. The IEC320/C7 input (or compatible) connector cable can be sourced locally, e.g. Newark, Qual Electronics, Radio Shack, etc. or other non affiliated distributors.
- 5 This feature protects output circuitry from output overvoltage caused by internal PSU failure.

- 6 Three orthogonal axes random vibration, 10 minute test for each axis.
- 7 The 'J' suffix indicates that these parts are Pb-free (RoHS 6/6) compliant. TSE RoHS 5/6 (non Pb-free) compliant versions may be available on special request, please contact your local sales representative for details.
- 8 NOTICE: Some models do not support all options. Please contact your local Artesyn representative or use the on-line model number search tool at <http://www.artesyn.com/powergroup/products.htm> to find a suitable alternative.
