

# INDUSTRIAL GPS TRACKER

## ULTRA LONG BATTERY LIFE - IP67 DEVICE

# Oyster

enabled by  sigfox

The Oyster is a low-profile, rugged GPS device designed to connect to the Sigfox Global network for tracking non-powered assets where ultra-long battery life is required without sacrificing the frequency of updates (up to 140x /day) and performance.

- A good compromise between size and performance
- IP67 rated housing (waterproof, dustproof, rugged)
- Up to 5 years battery life
- No install/pairing required
- Sigfox-ready device
- High performance ublox GPS with autonomous offline assist
- 3D accelerometer to detect movement and to launch GPS
- Available for all 4 Sigfox zones

### APPLICATIONS

Bin

Site Assets

Wagons

Trailers

Containers

Equipment

## OYSTER FEATURES & SPECIFICATIONS

Part#: DM OYSTER RCZ1 (868Mhz 100bps Europe)  
 Part#: DM OYSTER RCZ2 (902Mhz 600bps USA / Canada / Mexico / Brazil)  
 Part#: DM OYSTER RCZ3 (921Mhz 100bps Japan / Korea)  
 Part#: DM OYSTER RCZ4 (920Mhz 600bps AsiaPac / rest of South America)

MECHANICAL FEATURES	
Housing	ABS/Polycarbonate plastic UV stabilised IP67 rated
Fitment	Screw holes & strap slots
Operating Temperature	-20°C to +60°C
Dimensions & Weight	115 x 65 x 29mm / 190grams

Configuration cable not included.

\*Specifications are subject to change without notice. Images shown may vary from the actual product.

POWER	
Battery	3x AA batteries (not in cluded). (Li-SOCL2 battery option for harsh environments) Designed to last 5 years with GPS tracking 1x/day, 2 years with 10x /day
Sleep Current	5uA (micro-amps)

GPS TRACKING	
GPS Module	High sensitivity assisted GPS UBLOX, 72 channel receiver
GPS / GLONASS	Supports concurrent GPS and GLONASS for better & faster position fix
Antenna with Low Noise GPS Amplifier	Boosted by special low-noise amplifier (LNA) allows operation in “urban canyons” and containers. -167dBm industry leading tracking performance

SMARTS	
AssistNow Offline	Predicts satellite locations - reduces the time-to-first-fix - improves performance in ‘urban canyon’ or forested environments
G-Force Events	Built-in accelerometer detects high G impacts such as accidents and drops as emergency alerts
Internal Memory	Flash   up to 50,000 records. The memory is also used to store parameters, GPS aiding data, and other info securely stored

SENSORS	
3D Accelerometer	SLEEP MODE in an ultra-low power state and wake-up when movement occurs. It can also detect extreme G-Force events such as an accident or abuse of the asset

CONNECTIVITY	
Sigfox	Module with embedded protocol for operation under FCC & ANZ
